SOCIAL SECURITY STATISTICS AS UPDATED TO 1977-78

For a number of years the Research and Statistics Directorate of the Department maintained an historical series of social security statistics for Canada. "Government Expenditures on Health and Social Welfare, Canada, 1927-1959" represented the first attempt to collate the relevant program information for Canada and the provinces. Some of this information was also published in the "Historical Statistics of Canada", 1965. subsequent years summary information was published in the Canada Year Book and in the "Social Security Quarterly Bulletin" which terminated publication in 1970.

In 1977 the Department undertook to revise and update the social security statistics as a new chapter in the update volume of "Historical Statistics of Canada" which will be published shortly. This chapter as updated to 1976 was subsequently distributed on a limited basis by the Welfare Information Systems Branch of the Department.

This current volume of Social Security Statistics as updated to 1978 represents a considerable expansion in content over the earlier version. Not only are new program series introduced but the health sector has been disaggregated to identify the major thrusts in health activities expenditures. There is also a set of summary tables at the end followed by a series of tables providing statistical analysis of the overall program expenditures by broad program area and level of government.

MISE À JOUR: LES STATISTIQUES DE LA SÉCURITÉ SOCIALE, 1977-1978

Depuis plusieurs années, la Direction de la recherche et de la statistique du ministère de la Santé et du Bien-être social préparait une série historique sur la Statistique de la sécurité sociale au Canada. Le document intitulé "Government Expenditures on Health and Social Welfare Canada, 1927-1959" a été la première tentative faite en vue de colliger les renseignements pertinents sur les programmes, à l'intention du gouvernement fédéral et des provinces. Certaines de ces informations étaient aussi publiées dans "Historical Statistics of Canada", 1965. Plus tard, des renseignements sommaires étaient publiés dans L'"Annuaire du Canada" et dans le "Bulletin statistique trimestriel", de la sécurité sociale dont la publication a cessé en 1970.

En 1977, le ministère de la Santé et du Bien-être social entreprenait la révision et la mise à jour des statistiques sur la sécurité sociale, tel un nouveau chapitre de la deuxième édition de "Historical Statistics of Canada", qui sera bientôt publiée. Ce dernier chapitre, mis à jour en 1976, était par la suite, distribué de façon limitée, par la Direction générale des systèmes d'information du ministère de la Santé et du Bien-être social.

Les données que l'on retrouve dans le présent volume, mis à jour en 1978, représentent un contenu élargi par rapport aux données antérieures. Non seulement des données nouvelles sont introduites, mais de plus, le ministère de la santé a été disséqué pour identifier les secteurs où les principales sommes d'argent ont été affectées. On y trouve aussi, à la fin, un ensemble de tableaux nous donnant une analyse statistique des dépenses globales des programmes, selon le type de programme et le niveau de gouvernement.

Detailed documentation of the sources used in this publication appears in the previous edition as updated to 1976. For convenience, summary documentation appears in each of the tables in the current edition. The whole volume is now fully bilingual.

This branch wishes to acknowledge the sustained collaboration of the many program managers and staff who have contributed detailed program material and supporting comment as required to this publication. Most of the program statistics will be published elsewhere in annual program reports within the Department or the related agencies.

Detailed descriptions of many of the individual programs appear in the "Basic Facts Book on Social Security" and the Canada Year Book.

The current volume of Social Security Statistics is produced directly on a low-cost basis from the Social Security Statistical Database which has been developed by the Special Projects Division of the Information Systems Directorate. The driver program is flexible and information has already been analyzed and printed in alternate formats to meet special requests. We would find it helpful to receive comments and suggestions regarding the format and content of the report.

Une nomenclature détaillée des sources utilisées dans cette publication était déjà employée dans l'édition mise à jour en 1976. Cette nomenclature se retrouve dans chacun des tableaux de l'édition nouvelle, afin d'en assurer une meilleure compréhension. Ce travail est maintenant présenté dans les deux langues officielles.

La Direction de l'information voudrait souligner la collaboration soutenue des administrateurs des programmes et de leur personnel, dans la cueillette des données et dans l'apport d'observations judicieuses qui ont facilité la publication de ce document. La plupart des données statistiques que l'on retrouve dans cette publication seront aussi publiées dans les rapports annuels des programmes du Ministère et des organismes connexes.

On peut trouver, dans les publications suivantes: "Précis sur les programmes de sécurité sociale" et "Annuaire du Canada", une description détaillée de plusieurs des programmes particuliers.

Le présent volume sur les statistiques de la sécurité sociale est publié à frais réduits, à partir des données de base sur la sécurité sociale produites par la Division des projets spéciaux de la Direction des systèmes d'information du ministère de la Santé et du Bien-être social. Le programme de commande à l'ordinateur est flexible et les informations avaient déjà été analysées et imprimées pour répondre à des besoins particuliers divers. Vos commentaires et vos suggestions sur la présentation et le contenu de ce rapport seront vivement appréciés.

Le sous-ministre adjoint par intérim

J.N. Kent

Acting/Assistant Deputy Minister

INTRODUCTION

The social security system in Canada and other countries has developed in response to the need for governments to intervene in the economy of the country by providing funds and services to individuals and families to enable them to maintain themselves on a day to day basis. The Canadian system is oriented towards enabling individuals and families to maintain themselves in situations of adversity as far as possible and providing the necessary support and services to those unable to maintain themselves in independent living. The situations of adversity that have given rise to different social security programs are familiar to everyone. They include loss of income associated unemployment, the loss of ability to work because of injury or illness, loss of the family bread winner through death, the need for additional income to provide support for a growing family, the loss of income associated with retirement and old age, and the need for financial relief in meeting the costly drugs, hospital and medical services associated with severe illness and disability.

Provincial and municipal governments in Canada have responded to these needs by creating a network of health and welfare services including public hospital and medical care and a variety of social services dealing with problems of children, families, the disabled and the elderly. These services are backed up by programs of cash benefits which are often needed on a temporary or permanent basis to provide day to day support for those units unable to maintain themselves in independent living. In recent years the federal government has increasingly provided leadership in this area by providing financial cost-sharing support for provincial initiatives in this area. Independently, however, the federal government has also launched demogrant programs for the elderly and families, and income insurance programs to provide financial support for the elderly, the disabled and the unemployed.

INTRODUCTION

Les systèmes de sécurité sociale du Canada et des autres pays, ont été mis sur pied, pour répondre au besoin des gouvernements de s'impliquer dans l'économie de leur pays, en fournissant des services et des fonds pour les familles et les individus incapables de subvenir à leurs besoins essentiels. Le système de sécurité sociale du Canada est orienté vers les familles et les individus aux prises avec des problèmes de survie, en vue de les soutenir dans l'adversité, en leur fournissant le support matériel et les services nécessaires à leur survie. Ces situations de détresse assumées par différents programmes de sécurité sociale au nous sont familières. comprennent: la perte de revenu suite à une perte d'emploi, l'incapacité de travailler due à la maladie ou à un accident, le décès du soutien de famille, le besoin d'un revenu supplémentaire pour subvenir aux besoins d'une famille en croissance, la perte de revenu associée à la retraite et à la vieillesse et le besoin d'un supplément permettant l'accès médicaments, aux services médicaux hospitaliers en cas de maladie ou d'invalidité.

gouvernements provinciaux municipaux du Canada ont répondu à ces besoins en créant un réseau de services de santé et de bien-être social comprenant les soins médicaux et hospitaliers et une variété de services sociaux pour répondre aux problèmes enfants, des familles, des invalides et personnes âgées. Ces services sont soutenus par des programmes d'aide financière, sur une base temporaire ou permanente, afin de pourvoir aux besoins des personnes incapables de survivre de manière autonome. Dans les dernières années. le gouvernement fédéral a intensifié son aide dans ce secteur, par une participation financière aux frais des programmes provinciaux de sécurité sociale. Par ailleurs, le gouvernement fédéral a, de son côté, mis sur pied des programmes de démosubventions pour les personnes âgées, et les familles, et des programmes d'assurance-revenu pour fournir une aide financière aux personnes âgées, aux invalides et aux chômeurs.

While many of the initiatives in the social security system are administered by the health and welfare departments of the federal and provincial governments, the federal government also provides special programs for veterans of foreign wars and for the registered Indian population living on reserves. Programs dealing with income support for the unemployed, manpower training and rehabilitation of the disabled and disadvantaged are generally the responsibility of other departments of government.

It must be recognized that social security only represents one sector of the total social programs administered by federal and provincial governments. Programs which are primarily related to education, housing, employment and transportation are typically administered by the departments outside the area of health and welfare. It is only where these programs stray into providing special income support to persons or individuals with special needs that such initiatives are directly linked with and incorporated into the social security system.

In general the information provided in the accompanying statistical tables has been drawn from the public reports of federal and provincial agencies providing social security services or income support. In the provincial area, however, it has been necessary to make use of the provincial finance accounts developed by Statistics Canada to provide for a total accounting of provincial and municipal expenditures in the health and welfare area.

Beaucoup d'initiatives dans le système de sécurité sociale sont administrées conjointement par les ministères fédéral et provinciaux de Santé et de Bien-être social. De plus, le gouvernement fédéral assure des programmes spéciaux pour les anciens combattants à l'étranger et pour les Indiens enregistrés, vivant dans les réserves. Les programmes fournissant un appui financier aux chômeurs, aux personnes suivant des cours d'apprentissage ou de rédaptation dans le cas de personnes invalides ou défavorisées, sont généralement la responsabilité de d'autres ministères du gouvernement.

On doit reconnaître que la sécurité sociale représente seulement un secteur de l'ensemble des programmes sociaux administrés par les gouvernements fédéral et provinciaux. Les programmes touchant l'éducation, l'habitation, l'emploi et le transport sont administrés par des ministères autres que celui de la Santé et du Bien-être social. C'est uniquement lorsque ces programmes concernent le soutien financier à des familles ou des individus ayant des besoins spéciaux, que de telles initiatives sont directement reliées et incorporées au système de sécurité sociale.

En général, l'information jointe aux tableaux statistiques a été tirée des rapports publiques des organismes fédéraux et provinciaux de services sociaux ou de soutien du revenu. Pour le secteur provincial, il a fallu toutefois se servir des rapports financiers provinciaux, préparés par Statistique Canada pour donner un aperçu global des dépenses provinciales et municipales dans le domaine de la santé et du bien-être social.

The presentation of the information on social security programs is divided into four parts. First there is the national historical summary of total social security expenditures by The second section deals with national and provincial statistics on each social security program on an historical basis. The third section provides summary statistics on social security expenditures and each of the broad program areas. The fourth section provides statistical and economic analysis of the social security expenditures in relation to the overall population and personal income. Expenditure trends are analysed both in terms of current and constant dollars in relation to population.

La présentation des tableaux sur les programmes de sécurité sociale est divisée en quatre parties. En première partie, on retrouve un sommaire historique national de l'ensemble des dépenses de sécurité sociale, programme par programme. La deuxième partie traite de statistiques sur les programmes individuels des qouvernements fédéral et provinciaux dans la même perspective historique. La troisième partie fournit des statistiques sommaires sur les dépenses de sécurité sociale de chacun des secteurs majeurs. La quatrième section présente une analyse statistique et économique des dépenses de sécurité sociale en relation avec l'ensemble de la population et le revenu personnel. L'analyse des tendances observées dans les dépenses est présentée en terme de dollars courants et constants et basée sur la population nationale et provinciale.
